Departments & Doctors

Sunrise Multispecialty Hospital offers a wide range of specialized medical departments, each supported by experienced doctors, advanced diagnostic facilities, and patient-focused care models. Every department follows evidence-based medical practices to ensure accurate diagnosis and effective treatment.

---

1. General Medicine Department

The **General Medicine Department** serves as the first point of contact for most patients. It focuses on the diagnosis, treatment, and prevention of common and chronic illnesses affecting adults.

Services Offered

- Diagnosis and treatment of **fever, infections, and viral illnesses**
- **Diabetes management**, including blood sugar monitoring and lifestyle guidance
- **Hypertension (BP)** evaluation and long-term control
- Management of **respiratory, gastrointestinal, and metabolic disorders**
- Preventive health checkups and routine medical consultations
- Long-term care for chronic conditions such as asthma and thyroid disorders

Doctors

Dr. Ramesh Kumar, MD (General Medicine)
With over **12 years of clinical experience**, Dr. Ramesh Kumar specializes in managing complex medical conditions and chronic diseases. He is known for his patient-centric approach and accurate diagnosis.

Dr. Anitha Rao, MD (General Medicine)
Dr. Anitha Rao is a specialist in **diabetes care and metabolic disorders**. She focuses on personalized treatment plans, lifestyle counseling, and long-term follow-up to help patients manage diabetes effectively.

---

2. Cardiology Department

The **Cardiology Department** provides comprehensive care for heart-related conditions, ranging from early diagnosis to advanced interventional procedures. The department is equipped with modern cardiac monitoring and diagnostic tools.

Services Offered

- Diagnosis and management of **heart diseases and chest pain**

- **Electrocardiogram (ECG)** for heart rhythm analysis
- **Echocardiography (Echo)** for structural heart evaluation
- **Angiography** for detecting blocked arteries
- Treatment of hypertension, heart failure, and arrhythmias
- Post-cardiac procedure follow-up and rehabilitation guidance

Doctors

Dr. Suresh Reddy, DM Cardiology
A senior cardiologist with expertise in **interventional cardiology**, Dr. Suresh Reddy specializes in diagnosing and treating complex heart conditions, including coronary artery disease.

Dr. Kavitha Sharma, MD Cardiology
Dr. Kavitha Sharma focuses on **preventive cardiology**, early detection of heart disease, and lifestyle-based cardiac care, especially for high-risk patients.

---

3. Orthopedics Department

The **Orthopedics Department** specializes in the diagnosis and treatment of conditions related to bones, joints, muscles, and ligaments. The department provides both surgical and non-surgical solutions for musculoskeletal problems.

Services Offered

- Treatment of **fractures and trauma injuries**
- **Joint replacement surgeries** (knee and hip)
- Management of **arthritis and degenerative joint diseases**
- Sports injury evaluation and rehabilitation
- Post-surgical physiotherapy coordination

Doctor

Dr. Anita Sharma – Orthopedic Surgeon
Dr. Anita Sharma is an experienced orthopedic surgeon known for her expertise in **joint replacement and trauma care**. She emphasizes minimally invasive techniques and faster recovery protocols.

---

4. Neurology Department

The **Neurology Department** focuses on disorders related to the brain, spinal cord, and nervous system. The department provides timely diagnosis and specialized care for neurological emergencies and chronic conditions.

Services Offered

- **Stroke diagnosis and management**

- Treatment of **epilepsy and seizure disorders**
- Evaluation of headaches, migraines, and dizziness
- Management of neurological conditions such as Parkinson's disease
- Long-term follow-up for neurological rehabilitation

Doctor

Dr. Vikram Rao – Neurologist
Dr. Vikram Rao has extensive experience in treating **acute neurological emergencies**, particularly stroke cases. He also specializes in long-term management of epilepsy and neurological disorders.

---

5. Pediatrics Department

The **Pediatrics Department** provides comprehensive healthcare services for **infants, children, and adolescents**. The department focuses on preventive care, growth monitoring, and early disease detection.

Services Offered

- General child health checkups
- **Vaccination and immunization programs**
- Treatment of childhood infections and illnesses
- Growth and developmental assessments
- Nutritional guidance for children

Doctor

Dr. Sneha Patel – Pediatrician
Dr. Sneha Patel is dedicated to providing compassionate care for children. She specializes in **preventive pediatrics**, vaccination schedules, and parental counseling to ensure healthy childhood development.

Treatments & Medical Services

Sunrise Multispecialty Hospital provides a wide range of **advanced medical treatments and healthcare services** designed to meet the needs of patients across all age groups. The hospital combines experienced medical professionals, modern technology, and patient-centered care to ensure effective treatment outcomes.

---

1. Diabetes Management Program

The **Diabetes Management Program** is a comprehensive, long-term care service aimed at helping patients effectively control and manage diabetes while preventing complications. The program follows a personalized treatment approach based on each patient's medical condition and lifestyle.

Key Services Included

- **Blood Sugar Monitoring:**
  Regular monitoring of blood glucose levels using accurate diagnostic tools to track progress and adjust treatment plans accordingly.
- **Diet Counseling:**
  Personalized diet plans are created by medical professionals to help patients maintain healthy blood sugar levels. Patients receive guidance on meal timing, portion control, and food choices.
- **Insulin Therapy:**
  Insulin treatment is provided when required, with proper dosage planning and patient education on safe administration techniques.
- **Long-Term Follow-Up Plans:**
  Continuous follow-ups are scheduled to monitor health status, prevent complications such as nerve damage or kidney issues, and promote sustained well-being.

This program is ideal for both newly diagnosed patients and individuals with long-standing diabetes.

---

2. Cardiac Care Services

The **Cardiac Care Unit** offers complete heart care services ranging from diagnosis to treatment and recovery. The department is equipped with advanced cardiac diagnostic and interventional facilities to manage both routine and emergency cardiac conditions.

Services Offered

- **ECG & TMT (Treadmill Test):**
  These tests are used to evaluate heart rhythm, detect abnormalities, and assess cardiac performance under physical stress.
- **Angioplasty:**
  Minimally invasive procedures are performed to open blocked arteries and restore normal blood flow to the heart.
- **Heart Failure Management:**
  Patients with heart failure receive medication management, lifestyle counseling, and regular monitoring to improve quality of life.
- **Post-Surgery Rehabilitation:**
  Structured rehabilitation programs help patients recover after cardiac surgery through supervised exercise, dietary guidance, and medical follow-up.

The cardiac team focuses on early diagnosis, effective treatment, and long-term heart health.

---

3. Surgical Services

The **Surgical Department** provides both planned and emergency surgical procedures with strict adherence to safety and sterilization standards. Experienced surgeons and anesthesiologists work together to ensure successful surgical outcomes.

Surgical Facilities and Services

- **General Surgery:**
  Treatment of common surgical conditions such as hernias, appendicitis, and gallbladder disorders.
- **Laparoscopic Procedures:**
  Minimally invasive surgeries that result in smaller incisions, reduced pain, faster recovery, and shorter hospital stays.
- **Emergency Surgeries:**
  Round-the-clock surgical care is available for trauma cases, accidents, and other medical emergencies.
- **ICU Post-Operative Care:**
  Critical patients receive close monitoring and advanced life-support care in the Intensive Care Unit after surgery.

Patient safety, comfort, and recovery are the top priorities of the surgical team.

---

4. Diagnostic Services

The **Diagnostic Services Department** plays a vital role in accurate disease detection and treatment planning. The hospital offers a full range of diagnostic facilities supported by skilled technicians and modern equipment.

Diagnostic Facilities Available

- **24/7 Pathology Laboratory:**
  Blood tests, urine tests, and other laboratory investigations are available at all times to support emergency and routine care.
- **Imaging Services:**
  Advanced imaging facilities including **MRI, CT Scan, and X-Ray** help in detailed internal examinations and early diagnosis of diseases.
- **Ultrasound & ECG:**
  Non-invasive diagnostic tools used for evaluating internal organs and heart function.

All diagnostic reports are delivered with accuracy and timely interpretation to support effective treatment decisions.

Visiting Hours & Patient Guidelines

To ensure a safe, comfortable, and well-organized environment for patients, Sunrise Multispecialty Hospital follows structured visiting hours and clear patient guidelines. These policies are designed to

support patient recovery, maintain hygiene standards, and allow hospital staff to deliver uninterrupted medical care.

Visiting Hours

Outpatient Department (OPD)

The Outpatient Department operates from **9:00 AM to 6:00 PM**. During these hours, patients can consult doctors, attend follow-up visits, and access outpatient medical services. Appointments are managed to minimize waiting time and ensure smooth patient flow.

Inpatient Visiting Hours

For patients admitted to the hospital, visiting hours are scheduled from **4:00 PM to 6:00 PM**. This limited time frame helps patients receive emotional support from family members while allowing sufficient rest and uninterrupted medical supervision.

Emergency Services

The Emergency Department is available **24 hours a day, 7 days a week**. Emergency medical care is provided immediately without restrictions on time, ensuring that patients with critical conditions receive prompt attention at all hours.

Diagnostic Services

Diagnostic facilities, including laboratory tests and imaging services, are available from **8:00 AM to 8:00 PM**. These services support both outpatient and inpatient care and are operated by trained technicians using advanced medical equipment.

Intensive Care Unit (ICU) Visiting Policy

ICU visiting hours are strictly regulated to maintain a sterile and controlled environment.

- **Visiting Time:** 5:00 PM – 5:30 PM
- **Visitor Policy:** Only **one visitor per patient** is allowed during the visiting period.

These restrictions help reduce infection risks and ensure that critically ill patients receive uninterrupted medical monitoring.

Patient Guidelines

To maintain a safe and healing environment for everyone within the hospital premises, all patients and visitors are requested to follow the guidelines below:

Silence in Hospital Wards

Patients and visitors must maintain silence in wards and corridors. A calm environment plays a crucial role in patient recovery and allows medical staff to work efficiently without disturbances.

Mandatory Mask Usage

Wearing masks is compulsory in all clinical and patient-care areas. This policy helps prevent the spread of infections and protects both patients and healthcare workers.

Restriction on Outside Food

Food from outside the hospital is **not permitted** inside patient wards. Hospital-provided meals are prepared according to medical and nutritional guidelines specific to each patient's health condition.

Compliance and Safety

Failure to follow hospital guidelines may result in restricted access or intervention by hospital authorities. These rules are enforced strictly in the interest of patient safety, hygiene, and quality healthcare delivery.

Billing, Insurance & Payments

Sunrise Multispecialty Hospital follows a **transparent, patient-friendly billing system** to ensure clarity, fairness, and trust in all financial transactions. The hospital is committed to providing clear cost information and multiple payment options for the convenience of patients and their families.

Billing Information

All medical services at the hospital are billed using a **transparent and itemized billing process**. Each bill clearly lists consultation charges, diagnostic tests, procedures, room charges, medications, and any additional services availed during treatment.

Billing is generated **electronically**, which minimizes errors and ensures accurate record-keeping. Patients receive printed or digital copies of their bills for easy reference and future use.

For planned procedures and surgeries, **cost estimates are provided in advance**. These estimates help patients and families understand expected expenses and plan accordingly. Any changes in cost due to medical requirements are clearly explained by the billing staff.

Insurance & Third-Party Administrator (TPA) Services

The hospital provides **cashless treatment facilities** through leading insurance providers and Third-Party Administrators (TPAs), reducing the financial burden during hospitalization.

Supported Insurance Providers

Sunrise Multispecialty Hospital currently supports cashless and reimbursement services for the following insurers:

- **Star Health Insurance**
- **HDFC ERGO Health Insurance**
- **ICICI Lombard General Insurance**

The hospital's dedicated insurance desk assists patients with:

- Policy verification
- Pre-authorization requests
- Claim documentation
- Coordination with insurance providers

Patients are advised to carry their insurance card, identity proof, and policy details at the time of admission to ensure smooth processing.

Payment Modes

To provide maximum convenience, the hospital accepts **multiple payment methods**, including:

- **Cash payments**
- **Debit and credit cards**
- **UPI-based payments**
- **Net banking and online transfers**

These options ensure that patients and attendants can complete payments securely and without inconvenience.

Financial Assistance & Support

In case of billing-related queries, patients can approach the **Billing & Accounts Department**, where trained staff are available to explain charges and resolve concerns. The hospital ensures that all financial interactions are handled with professionalism and transparency.

Facilities, Emergency & Contact

Sunrise Multispecialty Hospital is equipped with **modern medical infrastructure and essential patient care facilities**, ensuring high-quality healthcare services with safety, speed, and reliability.

Hospital Facilities

The hospital provides a wide range of facilities designed to support **emergency care, critical treatment, and patient convenience**.

24/7 Emergency Care

The Emergency Department operates **round the clock**, handling medical, surgical, and trauma emergencies. A dedicated team of emergency physicians, nurses, and support staff ensures immediate attention for critical patients at any time of the day or night.

Intensive Care Units (ICU & NICU)

- **ICU (Intensive Care Unit):** Equipped with advanced life-support systems for critically ill adults requiring continuous monitoring.
- **NICU (Neonatal Intensive Care Unit):** Specialized care unit for newborns requiring intensive medical support, including premature and high-risk infants.

Both units are staffed by trained specialists and supported by modern monitoring equipment.

In-House Pharmacy

The hospital pharmacy operates within the premises, providing **easy and quick access to prescribed medicines**. Essential drugs, emergency medications, and long-term treatment medicines are readily available to ensure uninterrupted patient care.

Ambulance Services

Well-equipped ambulances with trained paramedics are available for:

- Emergency patient transport
- Inter-hospital transfers
- Accident and trauma cases

Ambulance services are coordinated directly with the emergency department to ensure rapid response.

Emergency Services

Sunrise Multispecialty Hospital maintains a **dedicated emergency response system** to ensure immediate assistance during critical situations.

- **Emergency Helpline:** XXX-XXX-XXXX
- **Ambulance Contact:** XXX-XXX-XXXX

These services are operational **24/7**, and patients are advised to contact the emergency helpline in case of accidents, sudden illness, or life-threatening conditions.

Contact Information

Patients, attendants, and visitors can reach the hospital using the following official contact details:

- **Phone:** +91-XXXXXXXXXX
